EDUCATION

Master of Science in Information Technology Management ***GPA- 3.5/4.00***
St. Francis College, Brooklyn, NY, United States ***2023-2024***

Coursework focused on Business Analytics, C++, Data Modeling, and applying IT strategy for organizational efficiency

Bachelor of Science in Agriculture ***CGPA-7.37/10***
Singhania University, Pacheri Bari, Rajasthan, India ***2016-2020***

Focused on crop production, soil science, pest management, and sustainable agriculture.

RESEARCH INTERESTS

Robotics, Computer Vision, Remote sensing, Precision Agriculture and Agriculture Automation, Digital Agronomy, UAV'S/UGV'S, AI in **A**griculture

PROFESSIONAL EXPERIENCE

RESEARCH & PRECISION FIELD OPERATIONS

Research Technician, *University of Nebraska-Lincoln,* *Lincoln, NE (Sep 2025–Present)*

- Conduct lab and field-based agricultural research to support crop improvement and sustainability projects within the MAARS (*Machine Automation & Agricultural Robotics*) Lab.
- Implement and operate drones (*UAVs*) for high-resolution aerial mapping, data collection, and advanced crop monitoring, leveraging FAA Part 107 knowledge.
- Directly work with agricultural robotics systems for automated planting, phenotyping, and specialized tasks, focusing on system calibration and field deployment.
- Operate tractors and GPS-equipped machinery for precision field trials and field preparation.
- Collect, record, and analyze soil, plant, and environmental data, implementing data-driven solutions to enhance crop efficiency.

Field Assistant, *Reo Agri Sciences*, *Andhra Pradesh, India (Jul 2020–Dec 2022)*

- Supported agricultural research and crop management through hands-on fieldwork, conducting field trials, crop monitoring, and soil/plant sampling.
- Assisted research teams in data collection, equipment maintenance, and documentation to improve crop productivity and sustainable farming practices.

Agriculture Technician (Internship*) ShivaShakti Bio Technologies LTD*, Hyderabad, India (Dec 2019–Mar 2020)

- Gained hands-on experience in modern farming technologies and sustainable practices by assisting with crop management, soil analysis, pest monitoring, and irrigation systems.
- Collaborated with professionals to collect and assess field data, implementing solutions that improved efficiency and yield across agricultural operations.

AGRIBUSINESS & EXTENSION

Area Business Development Manager *Narasimha Pesticides and Fertilizers,* *Guntur, India (Jul 2017–Dec 2022)*

- Led initiatives to empower local farmers through innovative agricultural solutions, bridging modern technology with traditional methods.
- Managed sales, product distribution, and farmer engagement programs across the assigned area.
- Collaborated with product teams to ensure the effective delivery of high-quality agricultural inputs and services.

Rural Agricultural Work Experience (RAWE) Internship *ICAR*, *Hyderabad, India (Aug 2019–Nov 2019)*

- Worked directly with farmers and rural communities to improve agricultural practices, assisting with cultivation, pest management, and soil analysis.
- Participated in field surveys and data collection, developing a strong understanding of agricultural extension services and rural development.

RESEARCH PROJECTS

Prof. Santosh Pitla, University of Nebraska–Lincoln *September'25 – Present*

Alternative Cover Crop Termination (ACCT)

- Leading research into non-herbicidal and non-tillage methods for cover crop termination across various crop trials.
- Conducting bench tests and field trials on innovative physical termination methods, including

UV-C radiation, heating (flaming/heat gun), and electrocution.

- Project goal is to develop sustainable, chemical-free cover crop management practices for improved soil health and reduced environmental impact.
- Designing and optimizing protocols for best-way application of these alternative termination technologies in an AgTech environment.

TECHNICAL SKILLS & CERTIFICATIONS

- **AgTech & Robotics:** *Agricultural Robotics, UAV/Drone Flight/Data Processing, GPS/Autosteer Systems, MAARS Lab Operations, Sustainable Farming.*
- *Data Analysis & Programming: Business Analytics, Data Modeling, Statistical Analysis, Python (Pandas, NumPy), C++, Arduino/Microcontrollers, Digital Agronomy Platforms.*
- **Certifications:** *FAA Part 107 Remote Pilot Certification (2025), Precision Agriculture & GPS Machinery Training, RAWE Program.*
- **Soft Skills:** *Sales Strategy, Farmer Outreach, Extension Services, Project Coordination.*

RELEVANT COURSEWORK

Information Technology & Data

- Business Analytics, Data Modeling, C++ Programming, IT Strategy, Database Management, Digital Transformation.

Agronomy & Core Science

- Crop Production and Management, Soil Science, Agricultural Entomology, Plant Breeding, Agricultural Economics, Extension Education

VOLUNTEER: Organic Farming & Tech Outreach *Rural Communities, India (2019–2020)*

- Volunteered extensively with local farming communities, motivating and guiding farmers toward the transition to organic farming practices.
- Provided extension services focused on technology adoption, sharing knowledge on modern agricultural inputs, and digital tools for farm management.
- Focused on demonstrating the long-term economic and environmental benefits of sustainable farming.
